

MOCCCA.

CONSULT. COACH. CHANGE.

Strategy, enablement and execution from a single partner — from management consulting to AI and intelligent automation.

A boutique consultancy for companies ready to change.

Moccca Consulting supports mid-sized and industrial companies from the first analysis to measurable impact in day-to-day operations. We combine management consulting and operational excellence with IT, artificial intelligence and intelligent automation.

HEADQUARTERS	Tallinn, Estonia
PRESENCE	Frankfurt am Main
COMPANY	Moccca Consulting OÜ
APPROACH	3C – Consult, Coach, Change
TEAM	Core team and Moccca Expert Network

What you can expect from us.

Consulting that reaches operations.

We deliver more than concepts. We stay until results arrive in day-to-day business and last.

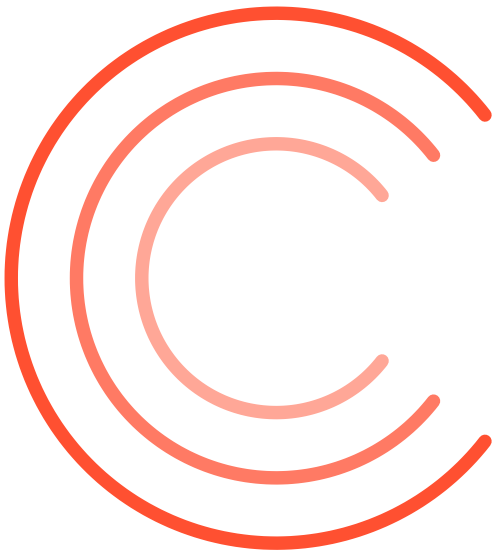

AI from our own practice.

What we recommend to clients, we trial in our own operations first — in Moccca Labs and in our own Agentic OS.

One contact, the right team.

A dedicated contact for every engagement, complemented by vetted experts from our network.

Every engagement runs through three phases.

CONSULT

Understand before we change.

Analysis, diagnosis and strategy: we make processes, figures and potential visible and turn them into a prioritised roadmap.

Analysis → Strategy → Potential

COACH

Enable, don't create dependency.

Knowledge transfer, workshops and leadership guidance: your organisation carries the change itself.

Knowledge → Enablement → Guidance

CHANGE

Deliver until the impact is measurable.

Transformation, automation and continuous improvement — until results reach day-to-day operations.

Execution → Automation → Improvement

Five service fields. One logic.

Strategy & Management

Strategy, restructuring, sales, supply chain and start-ups.

Operational Excellence

Stable, lean and measurable operations from the shop floor to the PMO — including LED conversion.

IT & Digitalisation

IT strategy, digital processes and day-to-day operation of Microsoft 365, websites and workplaces.

AI & Automation

AI strategy, agents and knowledge systems, embedded in real processes.

Digital Growth

Website, content, leads and CRM as one connected system.

LED conversion. Clearly calculated, properly delivered.

We check your lighting free of charge, calculate the business case openly and support the conversion through to verified savings — with vetted manufacturer partners or independently for a fee. You decide.

Free LED check

Existing lighting, usage and savings potential — without obligation.

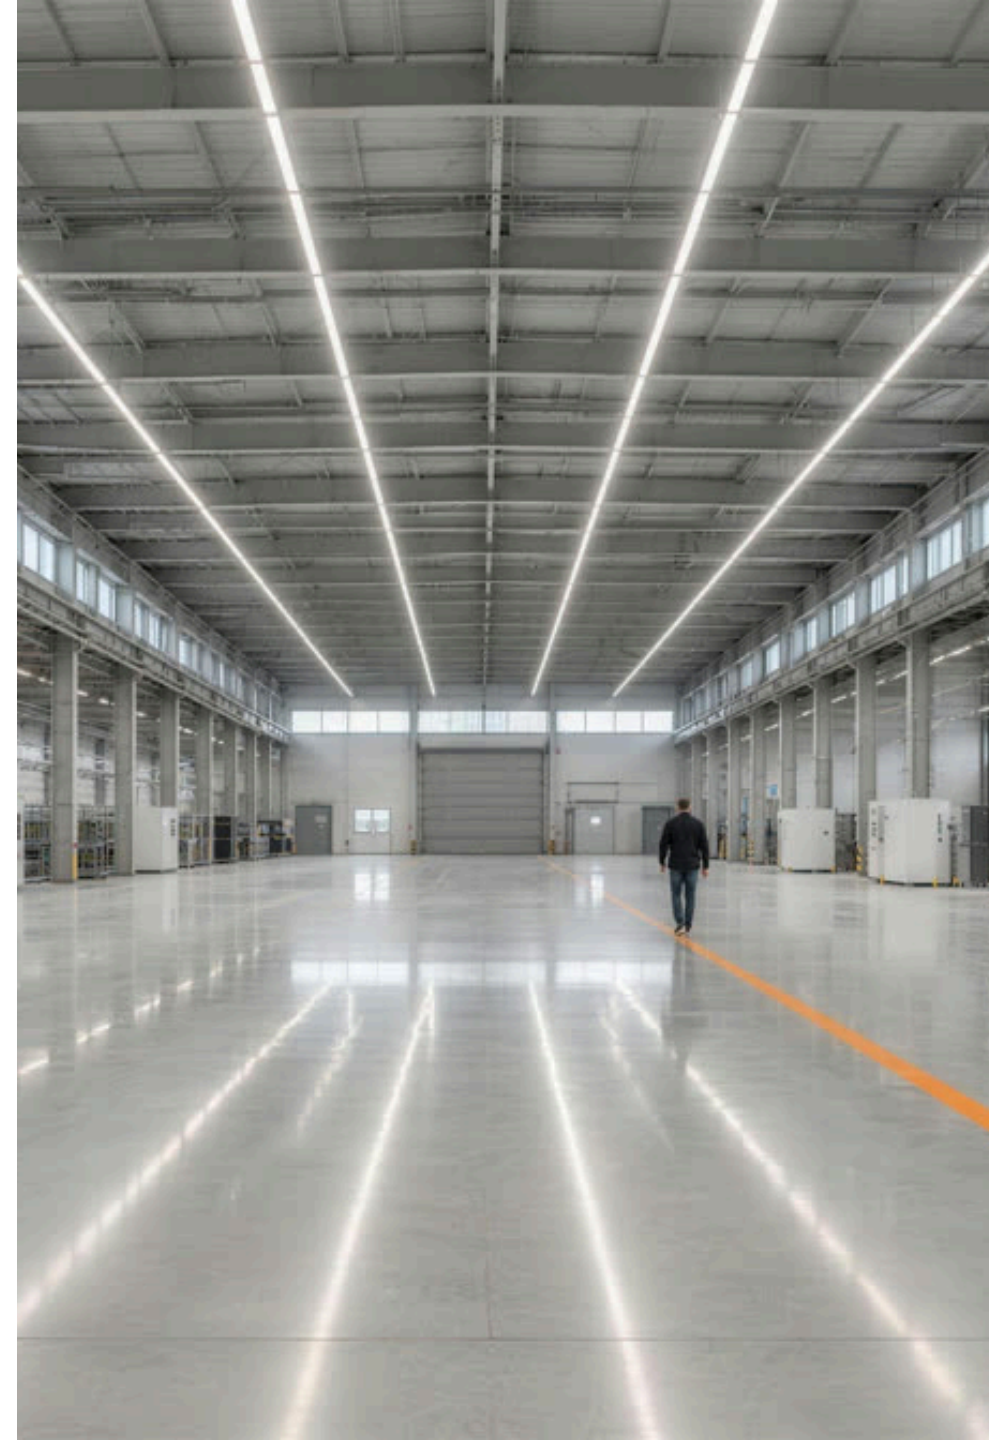

Partner or fee model

With a vetted manufacturer partner or manufacturer-neutral for a fee.

Verified savings

Baseline before, consumption after — for funding, banks and reporting.

Contact: Moccca sales team · sales@moccca.com

From Consulting to Continuous Intelligence.

Moccca Agentic OS connects company knowledge, AI agents, workflows and automation with day-to-day operations. Consulting results become running systems: agents research, prepare decisions and work through tasks — people approve.

Knowledge

Documents, notes and data as a searchable knowledge base.

Agents

Roles with clear tasks, permissions and budgets.

Workflows

Delegation, review and approval as defined routines.

Operations

Automations, reports and key figures in one view.

● Pilot phase · Access by invitation

We test new technology on ourselves first.

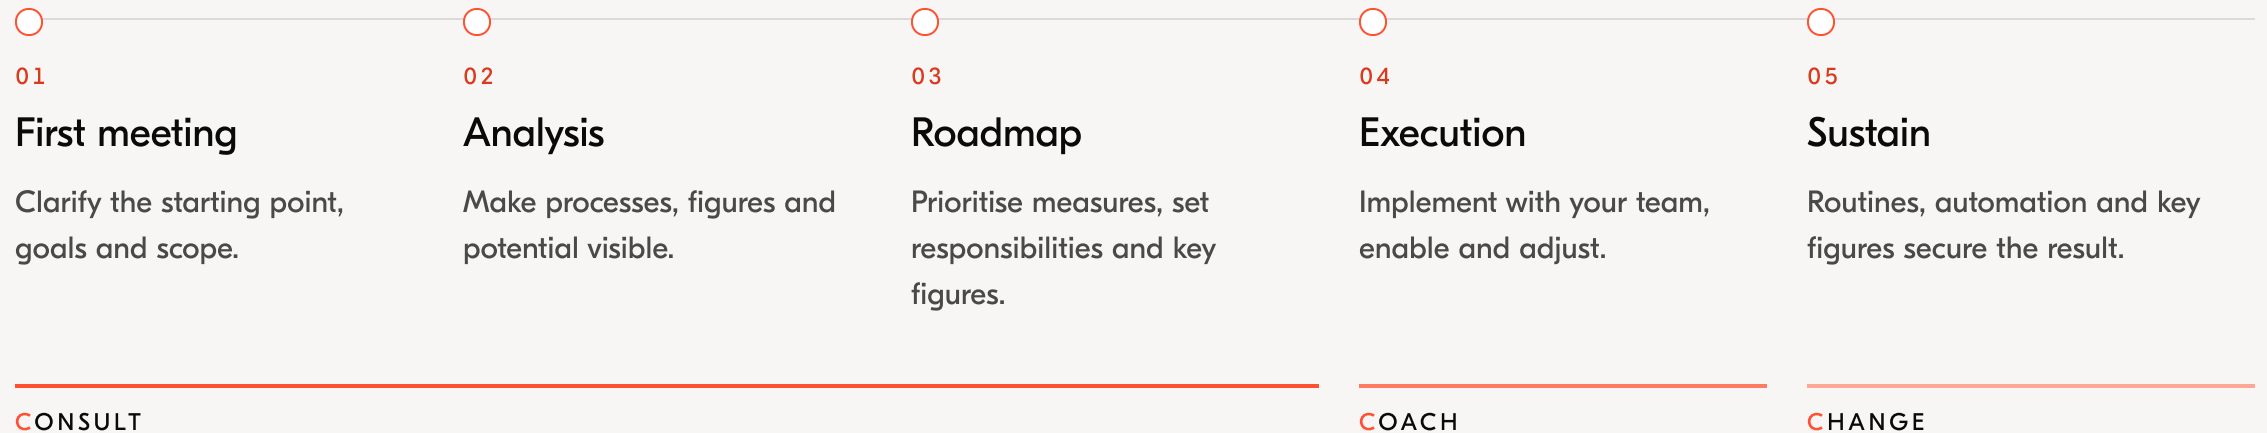

PROJECT	WHAT IT IS ABOUT	STATUS
Agentic OS	Command centre for agents, knowledge and automation	Pilot
AI Agents	Role-based agents for back office, sales and projects	Internal use
Voice AI	Voice control and speech output for briefings	Prototype
Digital Twins	Digital representations of processes and assets	Concept
Prototyping	Proofs of concept in weeks rather than months	On request

MOCCCA ACADEMY

In preparation

The Academy will bring together our trainings and workshops – on lean, AI in everyday work and leading through change. Formats and dates are currently being developed.

How we work with you.

Experience you can talk to.
